Price of fairness constraints, rural Chattogram ages 6-17
A. Cost of age coverage
Objective drop vs raw
Selected share aged < 13
proportional young floor
57.9%, cost 103.6
B. Reach cost of age coverage
Observed OOS not captured
Selected share aged < 13
proportional young floor
loss 113 observed OOS
C. Cost of gender coverage
Incremental objective drop
Selected share girls
No young floor
Proportional young floor
OOS-pool parity (37.4%)
Population parity (50.3%)
D. Reach cost of gender coverage
Incremental observed OOS not captured
Selected share girls
No young floor
Proportional young floor
OOS-pool parity (37.4%)
Population parity (50.3%)
